Summary

Software Engineering student with a strong interest in UI/UX design and front-end development. Experienced in creating wireframes, prototypes, and user-friendly interfaces using Figma, with project experience in CRM, hostel registration, and mobile e-commerce systems. Currently seeking an internship opportunity to grow as a UI/UX or product designer while contributing to practical digital solutions.

Education

Bachelor of Software Engineering (Honours)	September 2022 - Present
• Universiti Pendidikan Sultan Idris • Dean's List (Semester 1-7) • Current CGPA: 3.83	
Kedah Matriculation College	June 2020 - June 2022
• CGPA : 3.83	

Work Experience

Software Designer Internship

SecureLabX Sdn Bhd.	February - August 2026
• Designed intuitive user interfaces and prototypes for management systems and operational applications using Figma. • Standardized UI components, including colors, typography, and responsive layouts, to maintain design consistency across platforms. • Simplified complex workflows into clear, user-friendly screen layouts to improve overall usability and user experience.	

Packaging, Postage Management, Customer Service, and Promoter

Yemz Studio	August - September 2025
• Organized the packaging based on customer numbers and ensured accurate delivery. • Solved customer issues politely and effectively. • Engaged with customers to encourage product purchases	

Skills

Design Tools: Figma, Canva

UI/UX Design: Wireframing, Prototyping, User Interface Design, Responsive Layouts, Design Components

Front-End Development: React, TypeScript, HTML, CSS, Tailwind CSS

Development Tools: Git, GitHub, MySQL, Firebase, Supabase

Programming: JavaScript, Dart, PHP, Java, C++

Languages: Malay (Native), English (Fluent), Japanese (JLPT N3)

Projects

Full-Stack Development Project (2025)

- Collaborated in a team to develop a web-based hostel registration system for university students
- Built using Laravel, Livewire, and Spatie, integrating real-time validation and student record linking.
- Implemented group registration features and an admin management dashboard

Final Year Project - UniPerks Mobile E-Commerce Application (2025)

- Developed a gamified e-commerce mobile app for university merchandise.
- Integrated quiz and reward systems allowing users to earn coins and redeem vouchers.
- Built using Flutter, Dart, and Supabase with role-based access for admins and users.

Customer Relationship Management Full-Stack Development (2026)

- Designed wireframes, prototypes, and user flows for a CRM system using Figma, focusing on customer data tracking, invoice management, and marketing team usability.
- Built using React, TypeScript (TSX), and phpmyadmin (DB).
- The system helps the marketing team track customer data, invoices, and company records in one centralized platform, reducing reliance on Excel and improving data monitoring efficiency.

Achievement and Programs

- 5thPlace - MIST'24: Fundamental STEM Coding Challenge
- Computer Hardware and Software Maintenance for free (COMASPRO'23)
- 1stPlace - E-Sport MLBB Challenge, MIST'24
- 3rdPlace - Malaya E-Sport (University Malaya)
- SukIPT 6th Edition 2024
- 1st Place - SuperUPSI Esport MLBB 2024
- 2nd Place - SuperUPSI Esport MLBB 2025
